We don't intend to leave your generation with a generation gap.

Your generation will probably need as much electricity as we're using these days—and perhaps more—for homemaking, jobs, education, health care and cleaning up the environment. At Texas Electric, we've developed long-range plans to meet future demands for electricity. Because of dwindling supplies of natural gas, we're in the process of changing the fuels we use to generate your electricity. Lignite coal now supplies more than 40% of your electricity. In 1981, nuclear power will be added as a generating source. We're building plants that use these more abundant fuels and planning others for your future.

You can be sure we don't intend to leave your generation with a generation gap.

To a really nice person that has my freshman fun. & hope we'll be friends forever. Good luck in the future
Pete Lomeli

On June 20, 1782, the American Bald Eagle was chosen by our forefathers as our national emblem for it represented strength . . . the strength neccesary for which to build a free nation with the highest of ideals. As a pledge to these ideals, we at Eastland National Bank have incorporated the American Eagle in our new symbol . . . a symbol to remind our customers and ourselves of the pride we share in our rich heritage and the strength we pledge to our country and community. With this new symbol and its representations, we pledge ourselves to the future to better serve your needs and those of our community.
